POWER PROGRAMMER
INFORMATION PACK

YOU BRING THE POWER

We designed the Power Programmer career track for polyglots who want more than programming-as-usual – for software engineers who are experts across multiple technologies and who have the power to play the role of a full-stack developer in complex engineering projects.

The work is complex, but the concept is simple; you bring the power, and we'll give you the freedom to shape the future of technology.

A CAREER PROGRESSION BUILT AROUND YOUR PASSION

The Power Programmer track is a three-step career ladder that takes you from Specialist Programmer to Principal Technologist – and every step of the way your role is 100% focused on programming.

LESS MEETINGS, MORE CODING

We won't waste your talent on pointless meetings, bureaucracy or box-ticking. Infosys Power Programmers are given the freedom to focus on their passion: programming.

WHY WORK FOR ONE OF THE SMARTEST COMPANIES IN SILICON VALLEY, WHEN YOU COULD WORK FOR THEM ALL?

Working across a startling array of products, technologies and organisations, there is always a surfeit of new problems for Power Programmers to find and solve. It's like being freelance, but with the security of a highly-competitive paycheck.

KEY TECHNOLOGY AREAS

DEVOPS

Puppet/Chef, Docker,

Kubernetes/Mesos,

Jenkins, Git, Jira, Maven/Gradle

JAVA MICRO SERVICES

Java, JEE, Spring Boot,

Cloud Foundry, Docker

BIG DATA & ML

Hadoop HDFS, Hive,

Spark, Storm, Kafka,

Spark Mlib, Azure ML

FUNCTIONAL PROGRAMMING

Scala, Akka, Play

SCRIPTING & NO SQL

ReactJS, Angular JS,

ExpressJS, Node.js, Mongo DB,

Cassandra

THE ROLE

What do Power Programmers do?

- Program on emerging and next-gen technologies

- Build platforms, marketplaces and innovative solutions for the world's smartest companies

- Contribute and develop open source software

Working alongside other best-in-class programmers while developing your already deep coding expertise, you will collaborate with some of the best talent in the industry to create and implement innovative high quality programming solutions. You will be part of a learning culture, where teamwork and collaboration are encouraged, excellence is rewarded, and diversity is respected and valued.

Am I a Power Programmer?

As a Power Programmer, you have the ability to design, develop and troubleshoot applications developed on multiple languages and technologies in rapid sprints. You don't need to be an expert in every area but you should know about many and have deep expertise in at least one.

Possessing strong communication skills, you have the experience and desire to work in a global delivery environment. Capable of understanding and challenging client requirements, you're never scared of expressing your expert opinion or perspective.

Last, and certainly not least, you love analysing (and discovering) complex problems and have experience with all phases of software development across requirement gathering, high level design, low level design, build and unit testing, system integration testing, UAT support and production go live activities.

THE CAREER PATH

Create **Industry** Level Impact

Principal Technologist

Thought Leader

Create **Organization** Level Impact

Senior Technologist

Subject Matter Expert

Create **Unit** Level Impact

Specialist Programmer

JOIN INFOSYS, AND HELP US NAVIGATE THE WORLD FROM WHERE IT IS TO WHERE IT ASPIRES TO BE.
SEE THE FUTURE

Working with Infosys means working directly with the most exciting technologies of tomorrow. From Artificial Intelligence to Big Data to Blockchain, we give you the creative freedom to experiment and re volutionize use cases, so you can envision the best version of the future – a future from which everyone emerges a winner.

SET THE AGENDA

The people who work here don't just change businesses – they change lives, setting the agendas for digital projects that reverberate around the world. The world's largest companies and the billions of people they interact with worldwide are counting on you to navigate their future.

GO BEYOND WHAT YOU THOUGHT WAS POSSIBLE

Our world-leading development map and culture of continuous learning mean that you will always find yourself achieving more than what you previously thought possible. Through codethons and hackathons, apprenticeship opportunities with leaders, learning programs at Stanford and Purdue, and training in advanced technologies from partners like Udacity we help you build on what you already know and push you to be all that you can be – as a technologist, and as a human being.

HEALTH AND WELLBEING

aetna

- Health and Wellness Plan
- Comprehensive Medical Plan
- Disability and Life Insurance
- Dental Care

Employees trained in new technology areas

Infosys is a leading provider of next-generation consulting, technology and outsourcing solutions. We are dedicated to helping organizations build tomorrow's enterprise and advancing the way the world works. That's why Forbes ranks us 19th among the top 100 most innovative companies. Our employees partner with clients to transform their business – one conversation; one idea; one insight at a time. We will always be a company powered by intellect and driven by values. So, if your passion is to build solutions that really make a difference, Infosys is the right place for you.

WE KNOW THAT OUR DIFFERENCES MAKE ALL THE DIFFERENCE.

We are of varying backgrounds, interests, genders and orientations; from more than 100 nations; operating out of almost 200 locations worldwide. But we all have an equal enthusiasm to bring all of our unique selves to help create a better future together – one that's a reflection of our collective aspirations. For us, fostering an open, fair, inclusive and welcoming company is not just the right thing to do, but the smart thing to do, because we know that It's our differences that make it possible for us to deliver. From actively working to counter gender-based stereotyping and promoting a culture of meritocracy at all levels, to creating new opportunities for war veterans, or building innovative programs that empower marginalized segments of our population, we nurture a balanced workforce where each of us – different as we are – are brought together by our common aspiration to truly make a difference.

IT'S TIME TO SAY GOODBYE.

Goodbye to meetings.

Goodbye to bureaucracy

Goodbye to promotions to job roles that have nothing to do with programming.
